

Dynex Semiconductor Limited is a Lincoln based Engineering Company and a leading supplier of high power semiconductor devices with a world class reputation for supplying complex power assembly solutions.

## **Process Technician / Engineer**

An exciting opportunity for a full time role has arisen within our Bipolar department who are currently seeking a Process Technician / Engineer.

The successful candidate will be responsible to help the Assembly Engineer with the day to day running of the Assembly team and to learn all aspects of running and maintaining the SRP kit. As well as helping the metals engineer as required. The time between Assembly and SRP Metals will be split on an 80:20 basis.

### **Main tasks/responsibilities:**

Assembly:	Assessment of incoming components for quality and conformance to drawings. Carry out Operator re-Qualifications / Risk / COSHH assessments. Maintain existing processes and introduce new / improved process techniques. Update / maintain operator procedures. Update and maintain component drawings.
SRP:	Develop a full understanding of the SRP system and act as back up to the current engineer.
Metals:	Develop a full understanding of the Metals area and workings of the Aluminium evaporators and act as back up to the current engineer.

### **Key skills/core competencies required:**

- Qualified to ONC / HNC or BTEC equivalents or willing to work towards an ONC
- Qualification
- Good manual dexterity
- Understanding or willing to learn CAD Drawing.
- Capable of working under own initiative and as part of a team.

**The closing date for all applications is Monday 25<sup>th</sup> January 2010.**

Dynex Semiconductor Limited, Doddington Road, Lincoln, LN6 3LF, United Kingdom.
