

Custom Power Assemblies

Power Assemblies

Trust our experts to take your concepts from paper to reality

- Dynex design and manufacture customised Power Assemblies right from the initial concepts through to commissioning
- If you need unique products for specialised applications Dynex have the experience to work closely with our clients to ensure we produce the best fit
- We cater for Standalone Systems, Sub Components and Standard Power Assemblies
- We have vast experience with designing and manufacturing different assemblies using SCR Thyristors, GTO Thyristors and IGBTs Modules or Diode Modules
- Dynex are able to offer a range of designs with different cooling techniques such as; Natural Cooled, Forced Air Cooled, Water Cooled, Oil Cooled and Oil Submerged
- Dynex perform Factory Acceptance Tests as specified by our customers. Ensuring confidence in product ability to operate in all working conditions
- We can assist at all stages in the design process, or simply provide the benefit of our experience in manufacturing
