

Machine Shop Contract Services

Our in-house machine shop has an established professional team with a steady flow of apprentices to ensure we have the right skills for the future.

We use conventional and CNC machines to cater to customer requirements and are able to work with a wide range of materials. We can cater to functional prototypes and volume production rates.

Dynex is an ISO 9001 accredited company, and we ensure the quality of your product remains at the forefront of what we do.
